Tentang Saya

I am a UI Designer and UI/UX Engineer specializing in dashboard design, landing pages, and web design. I excel in UX problem-solving and have experience creating responsive interfaces using Figma and Adobe XD. With a background in HTML, CSS, and JavaScript, I collaborate effectively with front-end teams to ensure seamless implementation of designs that meet project requirements.

Skills

- UI/UX Design
- UI Design System, Auto Layout, Variabel Components
- HTML5, CSS (Tailwindcss), JavaScript
- Design Tools (Figma, Adobe XD)
- UX Solving
- Web Design
- Interaction UI Prototype
- UI Dashboard Design

Experience

PT. Solusi 247 Jakarta (Jakarta, Indonesia)

UI/UX Engineer (May 2023 - Now)

- Creating UI component assets for projects and developing HTML and CSS frameworks using Bootstrap 5.
- Converting design mockups provided by stakeholders into HTML, CSS (Bootstrap 5), and JavaScript.
- Analyzing UI designs to ensure an optimal user experience.
- Collaborating with Front-End and Back-End Developers.
- Designing UI dashboards and converting them into HTML, CSS, and TailwindCSS.
- Implementing web app slicing using PrimeVue and Vuetify.
- Collaborating with the team on best practices for UI flow using the Design Thinking methodology.
- Working remotely and effectively collaborating with the team.

PT Atask Teknologi Internasional (Freelance)

UI/UX Designer (September 2024 - January 2025)

- Designed the Homepage UI in collaboration with stakeholders to ensure the provided information is accurately represented.
- Ensured that stakeholder-provided information is effectively communicated on the Homepage.
- Converted the design into code using HTML, TailwindCSS 4, and JavaScript.

UI/UX Designer (September 2024 - January 2025)

- Designing mobile applications using Figma and ensuring alignment with business workflows.
- Collaborating with the team to understand business processes and create user-friendly flows.
- Creating interactive prototypes to demonstrate functionality and user experience.
- Ensuring all designs and workflows are intuitive and provide a seamless user experience.
- Performing minor revisions after the contract is completed.

UPVENDO (Freelance)

UI/UX Designer (November 2024 - Present)

- Designed a POS (Point of Service) application using Figma, ensuring alignment with business workflows and the provided design guide.
- Assisted Front-End Developers in speeding up implementation by creating easy-to-use designs with reusable components.
- Conducted icon research and developed custom icons for integration into Shopify Builder.
- Collaborated with stakeholders to refine user flow for better usability and streamlined development.
- Created UI designs for Web, Tablet, and Mobile versions.

Primeskills Edukasi Indonesia (Tangerang, Indonesia)

UI/UX Designer Intern (February 2023 - August 2023)

- Discussed digital product ideas with senior designers for brainstorming sessions.
- Applied Heuristic Design principles to optimize UI design.
- Conducted UI/UX research to create user-centric designs with the best possible experience.
- Successfully completed over five UI/UX design projects and collaborated with developers for seamless implementation.
- Performed Usability Testing using Maze to ensure ease of use and efficiency.
- Presented work internally twice to demonstrate progress and completed tasks.

Education

Universitas Terbuka (2023 - 2027)

D3 Information Systems

Universitas Jenderal Soedirman (2019-2022)

D3 Agribusiness - GPA 3,53

- Participated in the 2022 Student Creativity Program – Technology Development, presenting the idea "Development of the Warsoed E-Commerce Website as a Digital Marketing Solution to Increase MSME Revenue."

Senior High School YADIKA 6 Pondok Aren (2016-2019)

UI/UX Study Case Project

Ojek Campos Mobile App

Ojek Campos is a ride-hailing app that offers transportation, package delivery, and food delivery

services within the Purwokerto campus area. This app is specifically designed for students, both as its target market and as drivers, making it a student-centric solution for campus mobility.

Timeline: December 2022 – January 2023 (30 Days)

Mony App

Mony App is a Financial Technology (Fintech) or E-Wallet service that I developed as a project-based learning experience after completing a course from Buildwithangga.com. In this case study, I explored user behavior in online payments and designed features that enhance user convenience in making transactions.

Timeline : November – Desember 2022 (30 Days)

Redesign MyPertamina Mobile App

In this project, I redesigned the MyPertamina app to improve its features and enhance the user experience. Before starting the redesign, I conducted research by analyzing user reviews from the Play Store and App Store to identify common issues faced by users. Based on these insights, I applied problem-solving techniques to propose solutions and implement features that better meet user needs.
